

What Your Test Results Mean

Accessible version available at <https://www.cdc.gov/coronavirus/2019-ncov/testing/diagnostic-testing.html>

If you test positive for COVID-19

TAKE STEPS TO HELP PREVENT THE SPREAD OF COVID-19

STAY HOME.

Do not leave your home, except to get medical care. Do not visit public areas.

STAY IN TOUCH WITH YOUR DOCTOR.

GET REST AND STAY HYDRATED.

Take over-the-counter medicines, such as acetaminophen, to help you feel better.

SEPARATE YOURSELF FROM OTHER PEOPLE.

As much as possible, stay in a specific room and away from other people and pets in your home.

If you test negative for COVID-19

- You probably were not infected at the time your sample was collected.
- However, **that does not mean you will not get sick.**
- It is possible that you were very early in your infection when your sample was collected and that **you could test positive later.**
