

TYPES OF COVID-19 VACCINES

There are Currently 3 Types of Vaccines Authorized & Recommended

Moderna

Type: mRNA

Age Requirement: 18+

of Shots: 2 Doses (4 weeks Apart)

Who Should Not Get It:

-If you have had a severe allergic reaction (anaphylaxis) or an immediate allergic reaction even if it was not severe to any ingredient in an mRNA COVID-19 vaccine (such as polyethylene glycol), you should not get an mRNA COVID-19 vaccine.

-If you have had a severe allergic reaction (anaphylaxis) or an immediate allergic reaction even if it was not severe after getting the first dose of the vaccine, you should not get a second dose of either of the mRNA COVID-19 vaccines.

Pfizer

Type: mRNA

Age Requirement: 16+

of Shots: 2 Doses (3 weeks Apart)

Who Should Not Get It:

-If you have had a severe allergic reaction (anaphylaxis) or an immediate allergic reaction even if it was not severe to any ingredient in an mRNA COVID-19 vaccine (such as polyethylene glycol), you should not get an mRNA COVID-19 vaccine.

-If you have had a severe allergic reaction (anaphylaxis) or an immediate allergic reaction even if it was not severe after getting the first dose of the vaccine, you should not get a second dose of either of the mRNA COVID-19 vaccines.

Johnson & Johnson

Type: Viral Vector

Age Requirement: 18+

of Shots: 1 Dose

Who Should Not Get It:

If you have had a severe allergic reaction (anaphylaxis) or an immediate allergic reaction even if it was not severe to any ingredient external icon in the J&J/Janssen COVID-19 vaccine (such as polysorbate), you should not get the J&J/Janssen COVID-19 vaccine.

POSSIBLE SIDE EFFECTS FROM THE VACCINE:

In the Injection Site

- Pain
- Swelling
- Redness

Through Your Body

- Chills
- Fever
- Fatigue
- Headache
- Muscle Pain
- Nausea

Call Your Doctor When:

- If the redness or tenderness where you got the shot gets worse after 24 hours
- If your side effects are worrying you or do not seem to be going away after a few days

UCC PRESENTS:

EVERYTHING YOU NEED TO KNOW ABOUT THE COVID VACCINE

SCIENCE BEHIND THE VACCINE

When germs, such as the virus that causes COVID-19, invade our bodies, they attack and multiply. This invasion, called an infection, is what causes illness. The first time a person is infected with the virus that causes COVID-19, it can take several days or weeks for their body to make and use all the germ-fighting tools needed to get over the infection. After the infection, the person's immune system remembers what it learned about how to protect the body against that disease. COVID-19 vaccines help our bodies develop immunity to the virus that causes COVID-19 without us having to get the illness. Different types of vaccines work in different ways to offer protection. But with all types of vaccines, the body is left with a supply of "memory" T-lymphocytes as well as B-lymphocytes that will remember how to fight that virus in the future.

It typically takes a few weeks after vaccination for the body to produce T-lymphocytes and B-lymphocytes. Therefore, it is possible that a person could be infected with the virus that causes COVID-19 just before or just after vaccination and then get sick because the vaccine did not have enough time to provide protection.

BENEFITS OF GETTING THE VACCINE

- COVID-19 vaccination will help keep you from getting COVID-19
- COVID-19 vaccination is a safer way to help build protection
- COVID-19 vaccination will be an important tool to help stop the pandemic

MYTHS AND FACTS ABOUT THE VACCINE

MYTH

The Vaccine Can Make You Sick With COVID

-No Approved Vaccine Contains The Live Virus That Makes You Sick

You should be vaccinated regardless of whether you already had COVID-19

FACT

MYTH

The Vaccine Will Alter My DNA

-COVID-19 vaccines do not change or interact with your DNA in any way.

The COVID-19 vaccination protects me from getting sick with COVID-19

FACT

MYTH

The Vaccine Will Cause Me To Test Positive for COVID-19 on a Viral Test

-None of the approved vaccines can cause you to test positive on viral tests, which are used to see if you have a current infection.

HOW TO GET THE VACCINE

Fill out the Vaccine Interest Form at <https://covid-vaccine-interest.phila.gov/?lang=en-US> or scan this QR Code----->

Current Eligibility Groups

1A

- » Healthcare personnel
- » Residents of long-term care facilities

1B

- » Frontline essential workers
- » People aged 75 years and older

1C

- » People aged 65-74 years
- » People aged 16-64 years with underlying medical conditions
- » Other essential workers
